	Japanese Peony, Tora-no-maki —White	3.50
	Yellow Day Lily or Lemon Lily —Roots....	.25

GIANT DARWIN TULIPS (May-Flowering)

The Pride of the Garden—These Tulips have created a real sensation for the past few years, and one really does not wonder when seeing them in full bloom. They got their reputation through merit alone. They are the most brilliant in color and of the greatest variety of shades. Each flower is extremely large, thereby producing a most gorgeous show in any garden, either in beds, borders, or among shrubbery. With the exception of a few varieties, they are not very satisfactory indoors, and one must be an expert grower to flower them in the house at all, but they never fail outdoors. I list a few of the most select varieties:

- Baronne De La Tonnaye**—26 in. Clear carmine-rose, running into soft pink at the edges, a wonderful variety, each 7c
Inglescombe Yellow—A very large yellow, each 6c
Pride of Haarlem—Brilliant rose carmine extra, each 7c
Clara Butt—Delicate salmon rose, each 6c

OLD ENGLISH COTTAGE TULIPS (May-Flowering)

The Tulips belonging to this class owe their name to the fact that many of them had been found growing about country houses and cottages in England and France generations ago.

- Gesnerianna Spathulata**—Brilliant scarlet, dark blue center, each 7c
Columbus—Bright yellow, scarlet stripes and pointed petals, rare, each 10c
Glare of the Garden—Dazzling scarlet of immense size, each 8c
Sirene—A beautiful and elegant new Tulip of lily shape, derived from crossing *Tulipa retroflexa* with a pink Darwin Tulip. The color is beautiful cerise-pink with pale pink at the edges of the petals and a pure white base. First Certificate R. H. S. 1914; also First-Class Certificate Haarlem Bulb Growers' Society, 1914; each 25c

SINGLE EARLY TULIPS

- Joost van Vondel**—Cherry red feathered white, beautiful, each 6c
Joost van Vondel—White or Lady Boreal. Not for forcing, but good bedder, each 8c
White Hawk—The most handsome of all white tulips, each 9c

DOUBLE EARLY TULIPS

- Murrillo**—The most popular and satisfactory forcing tulip as well as the most beautiful house tulip and a good bedder as well, each 5c
Couronne D'Or—Rich yellow with copper shading, a fine forcer and bedder, each 5c

PARROT TULIPS

The planting of Parrot Tulips is increasing yearly. Their gorgeous colors and fantastic forms are certainly attractive. Their lacinated petals are unique among tulips. They bloom in May. I have them in mixtures only at, each 6c
 There are but three distinctive classes of markings in parrot tulips.

**BONNIE BRAE GARDENS
WATERVLIET, MICH.**

NARCISSI

Narissi are probably the favorite flowers of the garden in early spring, and by proper selection of varieties the blooming season will reach from March until early May. Of the easiest culture in both house and garden, the massive trumpets of the Ajax section or the dainty blooms of the smaller varieties are alike satisfactory.

King Alfred—The largest clear golden trumpet Daffodil in commerce today. Undoubtedly there are larger seedlings in existence but they are not in the trade as yet. This very high-class variety cannot be forced very early, and we advise Golden Spur for that purpose, each 25c

Golden Spur—The best of all the golden yellow Daffodils for all purposes. It is an excellent forcer in house or conservatory and is very satisfactory in the garden. The color of the entire flower is a very pleasing shade of golden yellow. It is not quite so large as Emperor, but stands next to it on account of its color, each 13c

Bicolor Victoria—Very large and lasting flowers. Creamy white perianth, fluted trumpet of rich yellow. Distinct from other bicolors, each 13c

Weardale Perfection—(Bicolor.) Perianth white; trumpet soft sulphur-white and exceedingly handsome. This flower is immense in size, and it is considered one of the best Bicolors. First Class Certificate, R. H. S.; Floral Certificate, Daffodil Conference 1896, each 25c

Six bulbs or roots of any one variety at five times the price of one.

Mixtures of Tulips, all shades and many varieties, six for 25c

Mixtures in Narcissi, all kinds, six for 25c

A collection of Peonies '5 varieties of my selection from **double named peonies** but without labeling, \$1.00. Everything herein quoted is delivery free to post or express office your town.

Visit my gardens at blooming time.

Yours truly,

WILL W. FISHER, Watervliet, Mich.

INSTRUCTIONS

The figures preceding the name of a peony represent its classification or scale of points in which 10 points denotes the highest quality as voted by the members of the American Peony Society and listed in the Symposium Bulletin No. 14, May 1921.

Discount for Quantities

Select \$11.00 worth for \$10.00. For larger quantities prices will be quoted to those submitting list.

Owing to expense of digging, labeling, packing, etc., orders for less than \$1.00 are not solicited.

TERMS

On orders given by visitors to my gardens during blooming season a notice and bill will be sent allowing the patron time to remit full amount before shipment. Cash with order to those ordering in shipping season.

PRICES

Prices here quoted are for sound healthy bulbs and roots of full standard blooming sizes and are delivered free to buyer.

PLANTING

In the case of tulips and narcissi the bulbs should be planted about four times their size below the surface but peonies should not have the topmost eye more than 2 inches below the surface. In every case the soil should be well drained, rich and porous but no green manure. Peonies will do well in very heavy clay if well enriched. In fact, no flowers will thrive under neglect, so don't expect that you can get the best results without care. Love is the keynote to success with flowers as well as with humanity.

Tulips, Hyacinths and Narcissus bulbs as well as Peony roots may be successfully planted from September 1st until the ground freezes, but the better way is to plant during September and October.

THIS LIST

This list carries only an abridged description. However, it is my intention before another year to issue a complete descriptive catalogue of all the varieties I grow to sell including my seedling peonies of 1916 planting.

Visitors are always welcome at Bonnie Brae Gardens and if you can do so, come and see my flowers while in bloom.
